Figure 1 consists of two panels, A and B, showing immunofluorescence images of thymocytes. Panel A is labeled 'Bcl-2' and shows a large number of cells with bright, punctate fluorescence. A white arrow points to a specific cell. A white scale bar is visible in the bottom left corner. Panel B is labeled 'MHC' and shows a smaller number of cells with bright fluorescence, indicating MHC expression. A white arrow points to a specific cell. Both panels have a dark background with bright spots representing fluorescently labeled cells.
